ORION
Novel Co-creation Initiatives
Funding Call Template

Project Title
Click to add text.

Project Lead
Name, position and association of project lead.

Co-authors
Name, position and association of all co-authors.

Summary
Brief summary of the project in lay language, including an outline of how you intend to implement your plan.
(max. 200 words)

Compliance with Conditions
How does your project meet the conditions of being: research-related, co-creative, innovative, relevant and ORION-aligned?

Questions to consider include:

What are the hypothesis and objectives of the research you wish to undertake?
How will this project contribute to the body of scientific knowledge?
Which three (or more) stakeholders to you wish to collaborate with?
How will you engage these stakeholders?
How will you include these stakeholders throughout the project lifetime?
How is your project novel and different form previous examples?
How will your project impact the stakeholders involved?
How will your project impact society?
What short-term and long-term impacts do you foresee?
How will you maximise the impact of your project (dissemination methods)?
How will you ensure that the project complies with Open Science and RRI principles?
Will your project include collaboration with, or dissemination to other European countries?
(max. 500 words)

Budget
Description of foreseen budget, and its breakdown in different categories. Categories include: personnel, travel, consumables, research services (core facilities, data management, storage, etc.), communication (website, community management, press releases, flyers, etc.), events (courses, talks, training for citizens, etc.) and any other foreseen costs (please justify).

Ethical Issues
If ethical issues are relevant for the proposed project (e.g. research on animals, human subjects or samples, or privacy and data protection), each of them needs to be addressed in this section.
